

Version list FS-i6S transmitter software/FS-i6S 软件版本更新记录

Software version 软件版本	2.0.0.10(CN)	Date 日期	06/2020
	2.0.0.68(EN)		

- **新增功能：**
- 新增锁屏功能，且锁屏时间可菜单选择（默认为 5 秒）
 - 新增 Rate/Exp(比率 / 曲线) 支持 Normal/Sport 两组状态数据，且可通过物理开关切换；
 - 新增 Rate/Exp. Switch 菜单，用来分配 Normal/Sport 两种状态的切换开关，默认未分配；
 - 新增教练模式，此功能可设置教练机对学员机的指导飞行，通过分配开关 SWA/B/C/D 控制教练模式的开启和关闭。开启教练模式后，遥控器 CH1-4 通道控制权交给学员机，关闭教练模式，恢复控制；
 - 新增学员模式，可设置该模式的开启和关闭，进入此功能后，遥控器关闭 RF，PS/2 接口输出 PPM 信号；其中 CH1-4 通道输出默认数据，不经过 Reverse、End points、Subtrim、Rate/Exp. 等功能的处理；重启遥控器自动退出学员模式。

- **修改功能：**
- 无

注意事项

- 更新完成后模型被复位（用户配套的模型需要重新调试参数）
- 更新完成后需重新与接收机对码
- 锁屏功能默认为开启状态；

以上步骤完成后，可正常使用。

- **New Features：**
- New auto lock screen function: the lock screen timeout can be adjusted in the relevant menu (default is 5 seconds)
 - New Rate / Exp support: Normal / Sport modes (controlled by switch)
 - Added Rate / Exp. Switch selection menu for assigning the Normal / Sport modes to a switch (unassigned by default)
 - New Trainer Mode: This function can set the guidance flight of the trainer aircraft to the student aircraft, through distribution switch SWA/B/C/D to control the starting and stopping of trainer mode. After turning on training mode, the flight control of the CH1-4 of the transmitter is given to the student aircraft. Turning off trainer mode will restore control;
 - New Student mode : This function can be set to turn on and off. After entering this function, the transmitter turns off RF, and the PS/2 interface outputs PPM signals;
 - CH1-4 channel outputs default data without processing by Reverse, End points, Subtrim, Rate/Exp., etc.; Restart transmitter to automatically exit student mode.

- **Editing：**
- None

Precautions

- The model data will be reset after the update is completed (The user will have to set their models up again)
- The receiver and transmitter must be bound again after the update
- By default the lock screen function is active.

After the above steps are completed, the system will function as normal.
